1. Analysis of Business Performance for Second quarter of Fiscal Year 2012

(1) Overview of Business Performance

Although continual gradual recovery could be seen, overall business conditions in the first half of Fiscal Year 2012 ending March, 2012 showed a slow-down with the prospects becoming more opaque toward the end of the half. As to the economic situation in the USA and EU, the speed of recovery was decreased, by growing concerns about financial system facing the Greek debt crisis in Europe, unemployment rate remaining at high level in the USA, an increase in material prices, a “top-heaviness” in consumer demand, and various other reasons. Emerging Asian economies kept growing at a continuous rate, mainly inland demand in China and India. However, a slight indication of deceleration in growth was recognized in China caused by the inflation control policy of the Chinese government. In Japan, the stable recovery of production activity, on the way to a quick restoration of its supply-chain following the 2011 earthquake off the Pacific coast of Tohoku (hereinafter referred to as “the Earthquake”) were confirmed; on the other hand, the prospects for the Japanese economy are unclear due to the shortages of power supply and the drastically increased value of the Yen.

In line with the conditions outlined above, the speed of capital investment from semiconductor device manufacturers has decreased the speed since the middle of the period, due to production adjustments partially seen in growing market products such as Smartphones and tablet PCs, in addition to the weak demand of consumers’ PC and digital appliances. Meanwhile, in the automobile and machinery equipment industry, the main customers for the Metrology business, the capital investment has been recovering moderately based on the firm market in Japan (rebuilding demand from the Earthquake) and Asian emerging countries such as China.

Under such business conditions, Consolidated Orders in 2nd quarter of FY2012 (accumulated April, 2011 – September, 2011) were ¥28.918 billion (up 4.3% YoY), Sales were ¥32.343 billion (up 37.3% YoY), Operating Income was ¥6.225 billion (up 109.5% YoY), Ordinary Income was ¥6.129 billion (up 172.1% YoY), and Net Income was ¥5.980 billion (up 150.4% YoY).

Business results in each segment for this period are as follows.

[Semiconductor Production Equipment (SPE)]

Although the capital investment of semiconductor device manufacturers was active in the first half of the period based on firm demand for Smartphones, tablet PCs, industrial machinery and communications infrastructures, their active investments turned toward a conservative-minded attitude in the latter half while, facing production adjustments of Smartphones and tablet PCs. Accordingly, the number of Orders were reduced in the latter half of the period. However the Sales and Shipments proceeded smoothly, as the supply chain was not disrupted as we had anticipated.

As a result, Orders received in the 2nd quarter of FY2012 (accumulated April, 2011 – September, 2011) were ¥18.800 billion (down 5.1% YoY), Sales were ¥22.756 billion (up 36.0 % YoY), and Operating Income was ¥4.116 billion (up 142.3% YoY).

[Metrology Equipment]

The automobile industry and machinery equipment industry, which are the major users of our products, showed a favorable business atmosphere. Capital investment kept recovering both in Japan and overseas, as the market was bullish in Asian emerging countries such as China, and there was a firm increase in recovery demand from the Earthquake disaster in Japan. We also focused on strengthening business in new industries such as Aircraft, Construction machinery and Energy.

As a result, Orders received in the 2nd quarter of FY2012 (accumulated April, 2011 – September, 2011) were ¥10.118 billion (up 27.6% YoY), Sales were ¥9.586 billion (up 40.3 % YoY), and Operating Income was ¥2.108 billion (up 65.8% YoY).

(2) Analysis of Financial Position

(A) Assets, Liabilities and Net Assets

Total Assets as of September 30th 2011, amounted to ¥82.782 billion, an increase of ¥5.744 billion from the end of FY2011 ended March 31st, 2011. The major factors behind this increase include an increase in Trade notes and accounts receivable of ¥3.316 billion, an increase in Cash and cash equivalents of ¥1.752 billion, an increase in Building and structures of ¥2.119 billion and a decrease in the Construction in progress account of ¥967 million.

Total Liabilities increased ¥652 million, to ¥32.762 billion. This was mainly because of an increase in Notes and accounts payable of ¥2.175 billion, and a decrease in Long-term debt of ¥1.944 billion.

Net Assets totaled ¥50.020 billion, an increase of ¥5.091 billion. This was mainly because of an increase in

Retained earnings of ¥5.767 billion.

(B) Cash Flows

Cash and cash equivalents as of September 30th, 2011 amounted to ¥17.944 billion, an increase of ¥1.701 billion from the end of FY2011 ended March 31, 2011. The status of cash flows and factors behind them are given below.

Net cash earned from operating activities was ¥5.698 billion, mainly due to Income before Taxes and minority interests of ¥6.091 billion, an increase in Notes and accounts receivable of ¥3.519 billion, an increase in Notes and accounts payable of ¥2.365 billion, Depreciation and Amortization of ¥914 million, and an increase in Inventories of ¥607 million.

Net cash used in investment activities was ¥1.542 billion, mainly reflected by purchase of tangible fixed assets of ¥1.449 billion.

Net cash used in financing activities came to ¥2.303 billion. The major element of this was Repayment of long-term debt of ¥1.944 billion.

(3) Forecasts for current Fiscal Year

The economic situation around the globe in the near future is prospected to remain opaque, mainly because of concerns about recession influenced by expanding financial crisis in Europe, the growing unbalance for foreign exchanges creating a drastically high value of the Yen, and the influence on our customers suffering from flood damage in Thailand. Under these circumstances, the Company had revised the prospected figures in profit as follows, which were previously announced on August 12, 2011, with consideration to the effects of cost reduction engaged until today.

Accordingly the Company plans to pay a ¥8 per share year-end dividends, which was previously announced as “undecided”. The kind understanding of shareholders would be highly appreciated.

FY2012 full year (April 1st, 2011 – March 31st, 2012)

(millions of Yen)

	Net Sales	Operating Income	Ordinary Income	Net Income	Net Income per share (Yen)
