Sales of Portable Roundness and Cylindrical Form Measuring Instruments "RONDCOM Zero 1" Commence

Tokyo Seimitsu Co., Ltd. (President: Kazuo Fujimori) will start sales of newly developed portable Roundness and Cylindrical Measuring Instruments "RONDCOM Zero 1".

The target of "RONDCOM Zero 1" is to measure inner diameter of bore hole on cylinder block of engines. This can measure roundness of diameter range from dia.65 to dia.100 of bore holes. Besides lightweight and compact, it comes with one-touch centering operation for easier setting in the production site.

Tokyo Seimitsu continues to enhance product line up in order to respond to all customer needs from measuring room to production site.

[Main Specifications]

- Measuring Range
 - Measuring diameter: dia.65 to dia.100
 - Up/down feed: maximum: 145mm
- Rotation accuracy: 1.0 μ m
- Straightness accuracy: 1.5 μ m/135mm

Schedules time of initiation of sales: January 2009
